Really well done, Julie. Congratulations to you and your entire team. Thanks for helping to bring antifungal resistance to the fore.

Best,
ramanan

Dear all,

I hope everyone is doing well! I wanted to reach out and provide a quick update on the follow-on activities after the workshop.

We are expecting a first complete draft of the workshop proceedings around Sep 2. Following that, staff will fact-check the full draft for accuracy against recordings and transcripts from the workshop. We will also reach out to speakers and moderators (present company included) so they can review just the sections specific to their presentation/session. The rest of the proceedings publication, including subsequent proofreading and copyediting, are all handled by the staff. Please do let us know if you would like to receive copies of the proceedings when it is published (electronic or print; if print, how many copies and what address to send to), we'll be happy to send those to you.

As you probably already know, we have heard positive feedback as well as potential follow up from many of the workshop participants. I have been in touch with the Society of Infectious Diseases Pharmacists in the US for their thoughts on putting out a position paper on antifungal resistance. If you are interested in staying engaged with developing this position paper, whether for awareness only or perhaps pitching in as appropriate, please let me know!

And finally, we received some high resolution photos from the photographer who was on site at the June 27 workshop, and I wanted to share those with you:

<https://www.dropbox.com/sh/nlhkekcvyczg69c/AAA0SZFPQ3avgDpq7Kdk3s9Xa?dl=0>

I think you can view and download the photos from the above link, but please let me know if you run into any problems. You are welcome to share or use these photos if you would like.

It was such a great joy and privilege to work with everyone in planning and executing this workshop. As Sally pointed out, this is the first time that our forum has convened specifically around a plant-related topic, and many “non-plant” forum members have shared that they found the material extremely interesting and that they learned a lot. Thank you for coming together around this important and timely issue. It was also simply wonderful to have met many of you in person, I am glad we had the opportunity to do so 😊

Warm regards,
Julie L
